Block Information

- Block
- Wildlife Tree Retention Area
- Timber Leave Area
- Existing Blocks
- Falling Corner
- Machine Crossing
- Resource Feature
- Block Center
- Heli Pad

Access Management

- Forest Service Road
- Proposed Permanent
- Gravel Pit
- Bridge

Riparian Information

- Reach Break
- NCD
- Fish Sensitive Zone
- S1; S2; S3; S4
- S5; S6;
- Riparian Reserve Zone
- Riparian Management Zone

Physiographic Data

- Break # Rock
- Draw
- Gully
- Ridge
- Windthrow
- Slide

Base Data

- Forest Cover
- Contour
- Ocean/Lake
- Wetland

CMT Information

- CMT - Standing Planked
- CMT - Standing Test Hole
- CMT - Stump
- CMT - Stump With Felled Log
- CMT - Worked Log

Resource Management

- Ungulate Winter Range
- Wildlife Habitat Areas
- OGMAs Approved
- BEC
- Parks (Protected Areas)
- Indian Reserves

**36.6 ha - Plant spring/summer 2021 Pli70% Sx20% Lw10%
at 1,700 sph with 2+0 PSB 410 stock
Reduce minimum inter-tree spacing down to 1.0m, as
required, to attain target stocking standard
BEC - MSdm2
Lat / Long - 49.19.16 / 119.33.21
Elevation - 1340-1560**

Block 229 - Opening Id 1723665
Access: From the town of Keremeos (town center) drive approximately 4.3 km west on highway 3 and turn left at Red Bridge onto Ashnola Rd. Continue for another 10.4 km to the end of the paved road to the 0 km board of the Ashnola FSR. Continue on the Ashnola FSR to approximately 31.5 km, turn right onto the McBride Creek FSR. Continue on the McBride Creek FSR for approximately 2.8 km until you reach the block which is on the left. The northern portion of the block is truck accessible from the McBride Creek FSR. The southern portion of the block is ATV accessible by using the in-block road, however approximately 400m from the McBride Creek FSR the bridge on the in-block road has been pulled. Therefore road rehab activities may be necessary in order to access the southern portion of the block.
